

BUSINESS NOTIFICATIONS

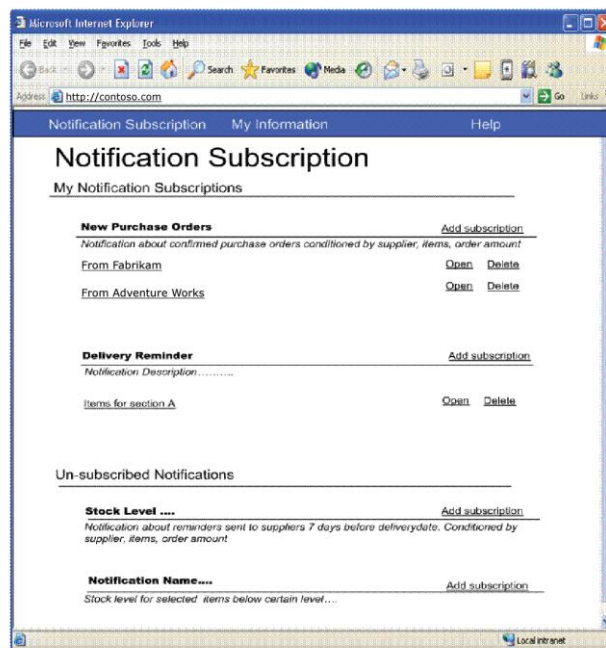

Business Notifications in Microsoft Dynamics NAV

BENEFITS:

- **Gain insight into the supply chain workflow.** Set up alerts and notifications to let you know when goods are delivered, adjustments are made to a bill of materials, or a crucial stock item is about to run out.
- **Increase your efficiency.** Focus on job-critical information by setting notifications to alert you about events important to your work, and direct automatic notifications to partners and employees.
- **Stay on schedule and minimize delays.** By having insight into business-critical events from anywhere within your organization, you can identify issues and work proactively to resolve them before they become problems.
- **Improve financial management.** Schedule alerts to notify you as you reach important milestones or limits so you can manage finances strategically.

Fuel productivity throughout your supply chain and manage your business processes with efficiency and effectiveness. Business Notifications in Microsoft Dynamics™ NAV can keep you aware of changing business conditions across the organization to help you keep operations on track.

Business Notifications empowers your people to efficiently manage your supply chain processes and respond quickly to shipment delays, order changes, and low inventory. You can use the six notification templates provided or set up your own custom alerts based on the way you conduct your business. You can send e-mail alerts to employees, vendors, customers, and partners so they can identify and address business-critical issues as they occur—and before they become problems.

With Business Notifications, you can easily subscribe to relevant notifications. Simply unsubscribe from ones you no longer need.

FEATURES:

Easy access to data	Replace paper-based reporting to monitor data and generate notifications—you can receive alerts about critical values and events in any area of your business. Alerts and notifications can be delivered as e-mail messages directly to your inbox.
Customizable notifications	Business notifications are easy to customize and configure, and can be set up in just a few steps. <ul style="list-style-type: none">• Define a set of conditions that filter business data further for greater detail and precision.• Create custom e-mail notifications by merging fields and parameters for system data or use plain text.• Customize and filter notifications to receive only the information that you need. For example, set up notifications about purchase orders including specific items.• Manage employee notification subscriptions effectively by defining which employees can subscribe to notifications.
Subscription management	Easily subscribe to the notifications that are relevant to you. When you no longer need a notification, you can simply unsubscribe.
Notification Templates	Six supply chain notification templates are provided out of the box: <ul style="list-style-type: none">• Purchase Order—Ensure Delivery of Goods: Send notifications to suppliers or other recipients to remind them of upcoming deliveries.• Purchase Order—Vendor Confirmation Not Received: Notify suppliers or recipients when you have not received an order confirmation.• Purchase Order—Goods Not Received from Vendor: Alert suppliers or employees when you have not received goods on the scheduled day.• Production Order—Production Delayed: Send notifications to internal account managers to inform them when production schedules and deadlines change.• Inventory—Item Quantity Status: Update suppliers when your inventory of a selected item has reached a defined level.• Production—BOM Items Updated: Notify your purchasing manager when a bill of material is modified.
