

# The Best Process for Selecting an ERP

Planning is key to your ERP success.

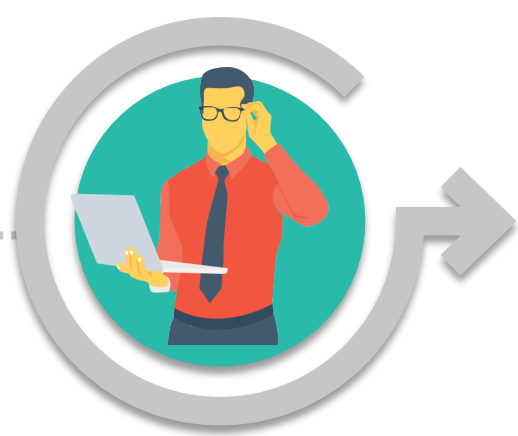

## Outline Your ERP Goals

Create and outline the goals for your project and system & be sure to align the goals with your **business objectives**.

## What is the 'Why' for Change?

The decision to acquire a new ERP should be **strategic**. Reasons for change may be to:

- Elevate & streamline your technology
- Decrease cybersecurity risks
- Minimize maintenance & support costs
- Improve ability to grow, expand, & scale
- Support merger & acquisition initiatives

## Visualize Your Future State

The ERP you select should support your business today, as well as your **10-year goal**. Otherwise, it will be a waste of time & money.

## Recruit an Executive Sponsor

They will support the project **at the highest level**, to anticipate potential obstacles & remove potential obstacles as they arise.

## Build a Selection Team

The team should be representatives from **each functional area**, involved in the implementation & management of the ERP.

## Want to Get Started?

Discover everything you need to know about how to select the best ERP system for your business.
